TO-KALON Wine Co.,
614 14th St.
Washington Grove News.
Special Correspondence of The Evening Star.
WASHINGTON GROVE, MD.,
August 20, 1902.

The entertainment Tuesday evening of the Grove chautauque was a stereotyped lecture by Professor B. P. Murray on "The Pan-American Exhibition." The principal features of the exhibition at Buffalo were shown on the canvas. Professor Murray has been operating the stereopticon for an hour and a half, and lectures during the chautauque. Miss Ethel Schaffer rendered a violin solo before the lecture opened.

At 7 p.m. Rev. Page Milburn of Union M. E. Church gave a Sabbath school formal talk on "The Holy Spirit." Rev. T. E. Copes of Goshute M. E. Church preached the sermon at the regular prayer meeting at 8 p.m.

A number of cottages have been closed since the camp meeting ended. About a week ago, when the census of the residents was taken, it was ascertained that there were over 900 persons on the ground.

Rev. and Mrs. H. R. Naylor have closed the presiding elder's cottage on the Circle and returned to the city.

Miss Mary McCubbin is visiting Miss Grace Hall on Grove avenue.

Mrs. Emmart and Miss Kate Emmart visited Mrs. John Meany on Wednesday.

Mrs. Thos. Dowling and Miss Grace Dowling have returned to the city.

"Butch" Thompson, a noted gambler, is dead at Saratoga, N. Y.

E. W. Grove.
This name must appear on every box of the genuine Lavette Brand Quinine Tablets, the remedy that cures a cold in one day. 25c. per box.

STREET DECORATIONS Committee's Appeal to Merchants and Others.

G. A. R. PARADE DAY

PRIZES OFFERED FOR BEST DISPLAY OF BUNTING.
Arranging for Reception of Veterans by Commissioner Ware at Pension Office — Boston's Plans.

At the instance of the executive committee of the 1902 encampment of the G. A. R., Chairman Cuno H. Rudolph of the committee on decorations will soon issue copies of the following circular to all Washington merchants and others who occupy buildings along the line of the two parades incident to the reunion in October:

"The committee on street decorations of the thirty-third national encampment of the G. A. R. is extremely anxious to have the co-operation of all persons who own or occupy buildings along the route of parade with a view to making such elaborate decorations as will attract and gratify not only our own citizens, but all visitors to the city during the encampment.

"This committee will furnish flags free of charge, as specified. It cannot supply bunting, emblems and other materials for decoration.

"Three prizes will be offered for the best display of bunting, flags and other decorations on buildings of prominent citizens at a public assembly in Masonic Temple on October 11, 1902.

"The committee asks your co-operation. Later details will be printed in the local newspapers."

A map of extraordinary interest is to be issued by the committee. It is described by Mr. Henry E. Davis during a visit to headquarters this morning as being a publication by the War Department during the first years of the war, giving all the fortifications about the city, and suppressed by the authorities almost as soon as printed. But two copies are known to be extant, said Mr. Davis.

When received at headquarters, through Mr. Davis' good offices, it is to be reduced and engraved for reproduction in the encampment booklet.

Reception by Commissioner Ware.
Mr. W. Hamilton Bayly, chief clerk of the pension bureau, called at headquarters this morning to confer with Mr. Warner as to the reception to be given to the veterans by Commissioner Ware. At present all the plans for this event are tentative, but the prospect is very attractive. Mr. Bayly and his associates of the committee, Messrs. L. W. Kelly and A. D. Albert, contemplate a reception in the city hall, and at about 4 o'clock in the evening, in order to save the time of the commissioner and the clerks as far as possible. The building will be carefully decorated, and the music furnished by the clerks themselves. Such a reception cannot fail to be one of the most interesting features of the entire encampment.

Boston's Delegation.
The Grand Army Club of Boston is completing its booking for the trip to Washington during the encampment at a rapid rate. The class of people listed for the journey is also most gratifying to those who are coming, according to a letter received this morning by Secretary Barry Bulley from Mr. John H. Putnam of Boston. Mr. Putnam's party will include a number of the general public, and in a special train, under personal escort, will visit a number of the prominent battlefields in the vicinity of Gettysburg, before coming to Washington. Accommodations have been engaged for the party at the Hotel Graton, and Mr. Putnam has requested Mr. Bulley to inform Proprietor Mills of the Graton that they will make his headquarters before they are done with him. He requests that any maps or other printed matter be placed at the Bostonians before the start. His message to Chairman E. B. Hay is to "watch the Massachusetts department, and see how we do the encampment business."

Ladies to Have Use of Convention Hall
In view of the alleged discontent among the ladies of the organizations who will participate in the reception to Gen. Torrance and the members of the national encampment during the encampment, Mr. Warner stated this morning that it had never been his purpose to oppose the wishes of the ladies, and that if it was their desire to have the reception in Convention Hall that hall would be placed at their disposal. "It is my belief," he added, "that the surrounding of the Arlington Hotel, as would commend the change to all interested, but it remains for Mrs. Mussey and her associates to determine whether the reception will be held in the Arlington Hotel or in Convention Hall." Several prominent members of the organizations said this morning that Convention Hall was the best place for the reception, and that the ladies' day evening will be the most acceptable to all concerned. The ladies say they had no desire to be contentious, but knowing the conditions under which the ladies are given were simply dismayed at the limitations about to be placed upon them.

Protest from Kansas.
The recent announcement in The Star that the veterans could have any kind of music they desired seemed to close the controversy over the statement made by Chairman Hay as to "ragtime." A letter just received at Mr. Hay's office, however, indicates that the old army music is still up for consideration. It is written by Commander H. C. Leomin of the Department of Kansas and reads as follows:

"Sir: My attention has been called to a statement, reported as coming from you, that you would issue an order prohibiting bands from playing old army music, and that they must play 'ragtime' music. You are quoted as saying: 'Many bandmen think a gathering of old soldiers calls for 'Marching Through Georgia.' 'Red, White and Blue' and a few other pieces of that class known as 'patriotic music'—and that nothing else should be played. They are all wrong on this and I intend to tell them so. It is not necessary to fill the air with these time-worn strains and old-fashioned tunes."

"I hope you have not been guilty of making any such statement and that you do not contemplate issuing any such order. If you do, Kansas will be the first to protest. In fact, if that is the spirit that pervades in Washington Kansas will not be represented at all. Kansas expects to have two bands and possibly three bands and the Modoc Singing Club of Topeka along. We will take them with us, and the only music we expect to hear from them will be the old army patriotic music—the kind, and the only kind, the boys are used to. This is our reunion and our kind of music."

What Bands Will Play.
"The Kansas bands will play 'We'll Rally 'Round the Flag, Boys, Rally Once Again,' 'The Union Forever,' 'Tramp, Tramp, Tramp, the Boys Are Marching,' 'Marching Through Georgia' and last, but not least, 'John Brown' and repeat. I speak for every comrade in this state when I say we won't stand it. Cut out these airs that have thrilled the hearts of the old soldier for forty years and put in the music that is the pleasure of an encampment is taken away. The boys in blue like them, want them and will have them, and the encampment committee certainly will not cut them out when it attempts to make the Kansas delegation eat ragtime music."

"It may be all right to have some of the ragtime music, but this is strictly an old soldier affair and we want and will have the kind of music that cheered the boys as they marched the step with which they served the Union. If you cut out the band can't play soldier music, cut them out and the Kansas bands will lead the parade and give the boys the step that will straighten up their backs and put them in line in good shape."

Application for Quarters.
Applications for quarters have been received from the following:

Gen. B. C. Bedell, commander of the departments of Washington and Alaska; the post at Brazil, Ind., for 40 members; post at Seattle, Wash., for 25 veterans; the Roman's Relief Corps of Chattanooga, Tenn., for 50 women; Veteran Post No. 1, New York city, 50 members; from the ladies of the Grand Army of the Republic, Department of Nebraska, post of Stewartstown, Pa., for 25 members; post Oswego city, N. Y., for 20 members; post at Kenton, Ohio, for 25 veterans; Hartman Post at Charlotte, N. C., 40 veterans. Has secured quarters at the residence of Mrs. H. O. Hicks, 215 East Capitol street.

In accordance with a statement made at the last meeting of the local encampment committee, Gen. Torrance has named his chief of staff, Col. A. Noel Blackman, as grand marshal of the veterans' parade. This provision of the program of the encampment in the G. A. R. Many veterans and the members of the citizens' committee desired that Col. Miles to serve in this capacity, but the committee decided to accept the first that Col. Blackman was to serve. Instead of acting as grand marshal, therefore, Col. Miles will review the line with Gen. Torrance, and the President will be the chief speaker at the meeting of welcome which is to occur Tuesday evening.

The division was effected by local survivors of the 14th Army Corps last night by the election of the following officers: Capt. Henry A. Castle, chairman; D. A. Groves, secretary; H. G. Potter, secretary. This body will meet again Monday evening at 8 o'clock.

Organize for the Reunion.
The survivors in Washington of the 23 Division, 3d Army Corps, have organized for the approaching reunion by the election of Charles F. Keefer as chairman, Charles S. Wilder as vice chairman, and J. L. H. Winfield as secretary. Secretary Winfield, whose address is the army paymaster general's office, 24 Division, is a resident of Washington whom he has not personally seen shall report their names and addresses to him.

CAPITAL CITY'S TREES Comparatively More Here Than There Are in Paris.

THE ANNUAL REPORT SUPERINTENDENT SHOWS 2,600 TREES PLANTED LAST YEAR.

Crusade Against Caterpillars — Tree Trimming Regarded as of Great Importance—Estimates for 1904.

When Col. John Biddle, the Engineer Commissioner of the District, recently returned from Europe he commented upon the fact that even in the beautiful city of Paris there were comparatively much fewer trees on the streets than there are here in Washington. The work of maintaining this record for the capital city has been pushed forward with energy during the past fiscal year, for, according to the annual report of Trueman Lanham, the superintendent of parking, 2,600 trees were planted on the streets in the city and suburbs within the twelve months ended June 30 last. These trees consisted of elms, ginkgos, lindens, Norway, silver and sugar maples, pin and willow-oak oaks, and were planted at an average expenditure of \$3 per tree, on the street, boxed, staked and strapped.

Mr. Lanham refers interestingly to the caterpillar pest. During the first quarter of the fiscal year caterpillars appeared on the trees in large numbers, but the new appropriation for the year being available on their first appearance, they were vigorously attacked and subdued without any great defoliation of the trees. The "elm beetles," which usually attack the elms during the month of May, did not make their appearance, and as a result a very unusual appearance at this time. It is noticeable that the elms are no more frequently attacked by the caterpillars than the other varieties are by the web-caterpillars and other insects, but the former are much more difficult to exterminate, because of the red and green color of the elms and the character of the insect.

Extermination of Caterpillars.
During the last month of the fourth quarter the web-caterpillars again appeared on the trees, and this being at a time when the appropriation was nearly exhausted, much damage would have resulted had not the sum of \$1,000 been allotted from the emergency fund for their destruction, which enabled the parking commission to successfully combat the pest.

It is stated that 22,000 seedlings were planted out in the new nursery, these consisting of the varieties named as planted on the streets and red and green elms. They are all in good condition, and the seed beds are well stocked with varieties which experience has shown to be the best for this locality.

In regard to tree trimming Mr. Lanham says:

"This is one of the most important matters under the jurisdiction of the office, and with the increase of area and number of trees planted annually it becomes more so. If the standard of excellence now attained is to be maintained in the future, the amount of money to be used for this purpose must be increased very materially. The cost of other district matters must be neglected. There are yet several thousand trees in the parkings on streets too narrow for double rows, very many of which were planted in the early days of the city, and have reached such a size that they should be severely trimmed in justice to the young and more desirable varieties at the curb."

AGRICULTURAL CHEMISTS. Nineteenth Annual Meeting to Be Held Here in October.

Dr. H. W. Wiley, chief chemist of the Agricultural Department and secretary of the Association of Official Agricultural Chemists, has issued a call for the nineteenth annual meeting of that body. Among the announcements thus made are the following:

"In harmony with the vote of the executive committee, the nineteenth annual meeting of the Association of Official Agricultural Chemists will be held in Washington, D. C., beginning Thursday, October 2, and continuing over Friday and Saturday, 3 and 4, and the business of the association is completed."

"The authorities of Columbia University have extended the courtesy of the use of the lecture hall for the purpose of holding sessions. The following order of business will be observed:

The president's address. Reports of the members of the association on the following subjects: first, report on nitrogen; second, report on potash; third, report on phosphoric acid; fourth, report on soils; fifth, report on ash; sixth, report on fertilizers; seventh, report on the report on food adulteration; eighth, report on dairy products; ninth, report on sugar; tenth, report on tannin; eleventh, report on the use of the microscope in the laboratory; twelfth, report on the use of the microscope in the laboratory; thirteenth, report on the use of the microscope in the laboratory; fourteenth, report on the use of the microscope in the laboratory; fifteenth, report on the use of the microscope in the laboratory; sixteenth, report on the use of the microscope in the laboratory; seventeenth, report on the use of the microscope in the laboratory; eighteenth, report on the use of the microscope in the laboratory; nineteenth, report on the use of the microscope in the laboratory; twentieth, report on the use of the microscope in the laboratory; twenty-first, report on the use of the microscope in the laboratory; twenty-second, report on the use of the microscope in the laboratory; twenty-third, report on the use of the microscope in the laboratory; twenty-fourth, report on the use of the microscope in the laboratory; twenty-fifth, report on the use of the microscope in the laboratory; twenty-sixth, report on the use of the microscope in the laboratory; twenty-seventh, report on the use of the microscope in the laboratory; twenty-eighth, report on the use of the microscope in the laboratory; twenty-ninth, report on the use of the microscope in the laboratory; thirtieth, report on the use of the microscope in the laboratory; thirty-first, report on the use of the microscope in the laboratory; thirty-second, report on the use of the microscope in the laboratory; thirty-third, report on the use of the microscope in the laboratory; thirty-fourth, report on the use of the microscope in the laboratory; thirty-fifth, report on the use of the microscope in the laboratory; thirty-sixth, report on the use of the microscope in the laboratory; thirty-seventh, report on the use of the microscope in the laboratory; thirty-eighth, report on the use of the microscope in the laboratory; thirty-ninth, report on the use of the microscope in the laboratory; fortieth, report on the use of the microscope in the laboratory; forty-first, report on the use of the microscope in the laboratory; forty-second, report on the use of the microscope in the laboratory; forty-third, report on the use of the microscope in the laboratory; forty-fourth, report on the use of the microscope in the laboratory; forty-fifth, report on the use of the microscope in the laboratory; forty-sixth, report on the use of the microscope in the laboratory; forty-seventh, report on the use of the microscope in the laboratory; forty-eighth, report on the use of the microscope in the laboratory; forty-ninth, report on the use of the microscope in the laboratory; fiftieth, report on the use of the microscope in the laboratory; fifty-first, report on the use of the microscope in the laboratory; fifty-second, report on the use of the microscope in the laboratory; fifty-third, report on the use of the microscope in the laboratory; fifty-fourth, report on the use of the microscope in the laboratory; one hundred and one hundred and twenty-seventh, report on the use of the microscope in the laboratory; one hundred and one hundred and twenty-eighth, report on the use of the microscope in the laboratory; one hundred and one hundred and twenty-ninth, report on the use of the microscope in the laboratory; one hundred and one hundred and thirtieth, report on the use of the microscope in the laboratory; one hundred and one hundred and thirty-first, report on the use of the microscope in the laboratory; one hundred and one hundred and thirty-second, report on the use of the microscope in the laboratory; one hundred and one hundred and thirty-third, report on the use of the microscope in the laboratory; one hundred and one hundred and thirty-fourth, report on the use of the microscope in the laboratory; one hundred and one hundred and thirty-fifth, report on the use of the microscope in the laboratory; one hundred and one hundred and thirty-sixth, report on the use of the microscope in the laboratory; one hundred and one hundred and thirty-seventh, report on the use of the microscope in the laboratory; one hundred and one hundred and thirty-eighth, report on the use of the microscope in the laboratory; one hundred and one hundred and thirty-ninth, report on the use of the microscope in the laboratory; one hundred and one hundred and fortieth, report on the use of the microscope in the laboratory; one hundred and one hundred and forty-first, report on the use of the microscope in the laboratory; one hundred and one hundred and forty-second, report on the use of the microscope in the laboratory; one hundred and one hundred and forty-third, report on the use of the microscope in the laboratory; one hundred and one hundred and forty-fourth, report on the use of the microscope in the laboratory; one hundred and one hundred and forty-fifth, report on the use of the microscope in the laboratory; one hundred and one hundred and forty-sixth, report on the use of the microscope in the laboratory; one hundred and one hundred and forty-seventh, report on the use of the microscope in the laboratory; one hundred and one hundred and forty-eighth, report on the use of the microscope in the laboratory; one hundred and one hundred and forty-ninth, report on the use of the microscope in the laboratory; one hundred and one hundred and fiftieth, report on the use of the microscope in the laboratory; one hundred and one hundred and fifty-first, report on the use of the microscope in the laboratory; one hundred and one hundred and fifty-second, report on the use of the microscope in the laboratory; one hundred and one hundred and fifty-third, report on the use of the microscope in the laboratory; one hundred and one hundred and fifty-fourth, report on the use of the microscope in the laboratory; one hundred and one hundred and fifty-fifth, report on the use of the microscope in the laboratory; one hundred and one hundred and fifty-sixth, report on the use of the microscope in the laboratory; one hundred and one hundred and fifty-seventh, report on the use of the microscope in the laboratory; one hundred and one hundred and fifty-eighth, report on the use of the microscope in the laboratory; one hundred and one hundred and fifty-ninth, report on the use of the microscope in the laboratory; one hundred and one hundred and sixtieth, report on the use of the microscope in the laboratory; one hundred and one hundred and sixty-first, report on the use of the microscope in the laboratory; one hundred and one hundred and sixty-second, report on the use of the microscope in the laboratory; one hundred and one hundred and sixty-third, report on the use of the microscope in the laboratory; one hundred and one hundred and sixty-fourth, report on the use of the microscope in the laboratory; one hundred and one hundred and sixty-fifth, report on the use of the microscope in the laboratory; one hundred and one hundred and sixty-sixth, report on the use of the microscope in the laboratory; one hundred and one hundred and sixty-seventh, report on the use of the microscope in the laboratory; one hundred and one hundred and sixty-eighth, report on the use of the microscope in the laboratory; one hundred and one hundred and sixty-ninth, report on the use of the microscope in the laboratory; one hundred and one hundred and seventieth, report on the use of the microscope in the laboratory; one hundred and one hundred and seventy-first, report on the use of the microscope in the laboratory; one hundred and one hundred and seventy-second, report on the use of the microscope in the laboratory; one hundred and one hundred and seventy-third, report on the use of the microscope in the laboratory; one hundred and one hundred and seventy-fourth, report on the use of the microscope in the laboratory; one hundred and one hundred and seventy-fifth, report on the use of the microscope in the laboratory; one hundred and one hundred and seventy-sixth, report on the use of the microscope in the laboratory; one hundred and one hundred and seventy-seventh, report on the use of the microscope in the laboratory; one hundred and one hundred and seventy-eighth, report on the use of the microscope in the laboratory; one hundred and one hundred and seventy-ninth, report on the use of the microscope in the laboratory; one hundred and one hundred and eightieth, report on the use of the microscope in the laboratory; one hundred and one hundred and eighty-first, report on the use of the microscope in the laboratory; one hundred and one hundred and eighty-second, report on the use of the microscope in the laboratory; one hundred and one hundred and eighty-third, report on the use of the microscope in the laboratory; one hundred and one hundred and eighty-fourth, report on the use of the microscope in the laboratory; one hundred and one hundred and eighty-fifth, report on the use of the microscope in the laboratory; one hundred and one hundred and eighty-sixth, report on the use of the microscope in the laboratory; one hundred and one hundred and eighty-seventh, report on the use of the microscope in the laboratory; one hundred and one hundred and eighty-eighth, report on the use of the microscope in the laboratory; one hundred and one hundred and eighty-ninth, report on the use of the microscope in the laboratory; one hundred and one hundred and ninetieth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundredth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and first, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and second, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and third, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and fourth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and fifth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and sixth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and seventh, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and eighth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and ninth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and tenth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and eleventh, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and twelfth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and thirteenth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and fourteenth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and fifteenth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and sixteenth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and seventeenth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and eighteenth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and nineteenth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and twentieth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and twenty-first, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and twenty-second, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and twenty-third, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and twenty-fourth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and twenty-fifth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and twenty-sixth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and twenty-seventh, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and twenty-eighth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and twenty-ninth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and thirtieth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and thirty-first, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and thirty-second, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and thirty-third, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and thirty-fourth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and thirty-fifth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and thirty-sixth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and thirty-seventh, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and thirty-eighth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and thirty-ninth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and fortieth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and forty-first, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and forty-second, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and forty-third, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and forty-fourth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and forty-fifth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and forty-sixth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and forty-seventh, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and forty-eighth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and forty-ninth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and fiftieth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and fifty-first, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and fifty-second, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and fifty-third, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and fifty-fourth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and fifty-fifth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and fifty-sixth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and fifty-seventh, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and fifty-eighth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and fifty-ninth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and sixtieth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and sixty-first, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and sixty-second, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and sixty-third, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and sixty-fourth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and sixty-fifth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and sixty-sixth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and sixty-seventh, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and sixty-eighth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and sixty-ninth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and seventieth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and seventy-first, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and seventy-second, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and seventy-third, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and seventy-fourth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and seventy-fifth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and seventy-sixth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and seventy-seventh, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and seventy-eighth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and seventy-ninth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and eightieth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and eighty-first, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and eighty-second, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and eighty-third, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and eighty-fourth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and eighty-fifth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and eighty-sixth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and eighty-seventh, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and eighty-eighth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and eighty-ninth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and ninetieth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and one hundredth, report on the use of the microscope in the laboratory; one hundred and one hundred and one hundred and one hundred and first, report
